PROFESSIONAL SUMMARY

Java Full Stack Developer with 1 year of hands-on internship experience building production-oriented web applications using Core Java, Spring, Spring Boot, JDBC, JPA/Hibernate, MySQL, MongoDB, and React.js. Strong command of Object-Oriented Programming (OOPs), Java Collections Framework, JDK/JVM internals, MVC architecture, and RESTful API design. Experienced in implementing JWT authentication, Role-Based Access Control (RBAC), database integration, third-party API integration, and cloud deployment on AWS. Collaborative team player with strong communication and problem-solving skills, delivering features on schedule in cross-functional Agile teams, **including a winning use case at the Virtusa Jatayu Season 5 Grand Finale.**

TECHNICAL SKILLS

Core Java: OOPs (Encapsulation, Inheritance, Polymorphism, Abstraction), Classes and Objects, Interfaces, Abstract Classes, Constructors, Exception Handling, Multithreading, Generics, Lambda Expressions, Streams API, String Handling, File I/O, Java Libraries, Java 8+ Features

Collections Framework: Collection Interface, List (ArrayList, LinkedList), Set (HashSet, TreeSet), Map (HashMap, TreeMap, LinkedHashMap), Queue, Iterator, Comparable, Comparator, Collections Utility Class

JDK / JVM: JDK, JRE, JVM Architecture, Class Loader, Heap and Stack Memory, Garbage Collection, Bytecode, Java Memory Model

Frameworks: Spring Framework (IoC, Dependency Injection), Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, Microservices

Design Patterns / Architecture: MVC Pattern, DAO Pattern, Singleton, Factory, Layered Architecture, REST Architecture

Database / Persistence: JDBC, JPA, Hibernate ORM, MySQL, PostgreSQL, MongoDB, SQL (Joins, Indexes, Subqueries, Normalization), JPQL

Frontend: React.js, Redux, JavaScript (ES6+), TypeScript, HTML5, CSS3, Bootstrap, AJAX, jQuery

Backend / APIs: REST APIs, Node.js, Express.js, JSON, API Integration, Postman, Multer, Nodemailer

Security: JWT Authentication, OAuth2, Role-Based Access Control (RBAC), Spring Security

Tools and Platforms: Git, GitHub, Maven, Gradle, IntelliJ IDEA, Eclipse, VS Code, Postman, Linux, AWS, Render, Android Studio

Other: Agile/Scrum, Unit Testing, API Testing, AI Agent Integration, LLaMA 3.2, Razorpay API, VirusTotal API, Have I Been Pwned API

Soft Skills: Team Collaboration, Communication, Problem Solving, Time Management, Adaptability, Ownership

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern (Delivery) | Virtusa Consulting Services Pvt Ltd | Mar 2026 – Jun 2026

- Contributed to CareBank, an AI-powered expense tracking and financial insights platform, delivered on a 4-month timeline (Mar 2026 – Jun 2026) and **selected as the winning use case at the Virtusa Jatayu Season 5 Grand Finale.**
- Developed 4 RESTful API modules (authentication, transaction processing, file uploads, email notifications) using Node.js and Express.js for both web and Android clients.
- Implemented JWT-based authentication and secure API access for the web and Android platforms.
- Designed MongoDB schemas and integrated database operations for transaction storage, expense analysis, and reporting.
- Integrated AI agents and LLaMA 3.2 for transaction categorization, spending-behaviour analysis, and predictive financial insights.
- Integrated the Razorpay payment gateway and collaborated with cross-functional Agile team members on architecture, testing, and deployment, then presented the final product demonstration.

Full Stack Developer Intern | Think Info Expert Solutions, Salem, India | Jun 2025 – Feb 2026

- Developed full-stack applications using Java, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, and React.js following MVC and layered architecture.
- Built secure REST APIs with Spring Security, JWT authentication, and Role-Based Access Control for multi-role applications.

- Implemented data access using JDBC and JPA/Hibernate with MySQL and MongoDB, writing optimized SQL queries and entity mappings.
- Applied OOPs principles, Java Collections, Streams, and exception handling to build clean, reusable, and maintainable service-layer code.
- Built WebFoxShield, a security website and browser extension using TypeScript, React.js, and Node.js, integrating 2 third-party security APIs (VirusTotal and Have I Been Pwned).
- Created reusable React components with modular architecture and consumed REST APIs for frontend-backend communication.
- Collaborated with team members and mentors in Agile sprints over a 9-month internship (Jun 2025 – Feb 2026), communicating progress and resolving issues; deployed applications on AWS and worked in Linux with Postman API testing and Git.

PROJECTS

FarmConnect – Farmer-to-Consumer Marketplace Platform

Tech: Java, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, JWT, REST APIs, MySQL/MongoDB, React.js, Maven

- Developed a 3-role marketplace (Farmer, Consumer, Admin) with secure Spring Boot REST APIs and React.js interfaces for product listings, inventory, orders, and workflows.
- Implemented JWT authentication and RBAC with Spring Security to protect endpoints by role.
- Designed JPA entities and repositories with Hibernate for relational mapping, and structured the code in Controller, Service, and Repository layers (MVC).

Core Java Application – OOPs, Collections and JDBC (MVC Architecture)

Tech: Core Java, JDBC, MySQL, Collections Framework, Exception Handling, MVC Pattern, DAO Pattern

- Built a Java application applying OOPs concepts: classes, objects, inheritance, polymorphism, abstraction, interfaces, and encapsulation.
- Implemented the MVC and DAO patterns to separate model, view, controller, and data access logic.
- Used Collections (ArrayList, HashMap, HashSet), Comparable/Comparator, Streams, and custom exceptions for data processing and validation.
- Performed CRUD operations through JDBC with MySQL using PreparedStatement, connection handling, and transaction management.

CareBank – Smart Expense Tracking System (Website + Android APK)

Tech: Node.js, Express.js, MongoDB, JavaScript, JWT, Razorpay, Nodemailer, Multer, AI Agents, LLaMA 3.2, Render

- Built a cross-platform financial tracking product with transaction processing, AI-driven suggestions, future spending insights, and Razorpay integration.
- Integrated AI agents and LLaMA 3.2 for expense categorization and predictive insights; deployed on Render.

WebFoxShield – Browser Privacy and Security Monitor (Website + Extension)

Tech: TypeScript, React.js, Node.js, REST APIs, VirusTotal API, Have I Been Pwned API, AWS

- Developed a website and browser extension to monitor browsing activity with alerting and third-party security API integrations; deployed on AWS.

BankSMS – Android Transaction Extraction Application

Tech: Kotlin, Java, Android Studio, MongoDB Atlas

- Developed an SMS-based transaction extraction and categorization Android app with server synchronization.

Library Management System

Tech: PHP, AJAX, jQuery, SQL

- Built a web-based system for books, users, and borrowing transactions with CRUD operations and asynchronous UI updates.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science and Engineering

Mahendra College of Engineering, Salem | CGPA: 8/10 | Graduation: 2026

CORE COMPETENCIES

Object-Oriented Programming, Data Structures and Collections, RESTful Web Services, Spring Boot Microservices, ORM and Database Design, Application Security, MVC Architecture, Agile Development, Debugging and Problem Solving
